Submitter Comments:

The Queensland government proposal is unethical because it potentially violates the rule of law and compromises the doctrine of the separation of powers, opening the door for corruption. The legislations that the government wants to override are beneficial for the sustainability of Brisbane and add more value for future generations of residents than a poorly planned overdevelopment in the heart of the city on top of its green lungs. The current government was elected on the promise of building on brownfield sites and undoubtedly will not be re-elected because it has shown itself to be unethical. Due process must be adhered to in order to maintain the rule of law and the doctrine of separation of powers. Victoria park must be conserved as a valuable ecological habitat and heritage resource for all people of Queensland including First Nations people who have ancestral ties to the country it is a remnant of. I am a resident of Brisbane and wish to save the remaining green space. I wish for the Olympic stadium to be built on a brownfield site in a sustainable and ethical development.
